

A photograph of three people sitting around a dark table in a bright room with large windows. A man on the left is partially visible, wearing glasses and a white shirt. A woman in the center is smiling and looking towards the right. A woman on the right is also smiling and looking towards the center. They appear to be in a collaborative meeting. There are papers, a water bottle, and a laptop on the table.

BECOME A SCRUM MASTER

Scrum is a framework that helps teams and organisations achieve the best possible output from their efforts. Scrum is simple and effective, making it one of the most common and widely used agile methods for working with complex problems and projects.

The framework is simple to understand, but complicated to implement successfully if you do not have insight into the agile values and principles that lie behind it.

In this course, you learn the core of the agile mindset, and how the Scrum framework can support teams and organisations in their agile development.

The course prepares you for the official certification exam “Professional Scrum Master® I (PSM I)” from Scrum.org. With a passed exam, you are a certified Professional Scrum Master® from Scrum.org.

Participant Profile

The course is for everyone who wants to increase their agile insight and competencies and would like to achieve an internationally recognised certification of their skills.

Whether you work with management or development, this course provides you with a better starting point for working in an agile context.

The course is relevant for new Scrum Masters who want an improved understanding and a solid agile toolbox, but also for experienced Scrum Masters who seek inspiration and wish to sharpen their competencies.

It is not a requirement, but it is an advantage if you have prior knowledge of agile project management (e.g. from the courses in [Agile Project management](#) or [Digital project management 2](#)).

“The most important thing I learned was how to balance the framework with real-world scenarios. The instructor presented the values, principles, and best practices of scrum, but still emphasised it needs to be thought out in a context, which is unique to the industry, company, etc.

– Amanda Teixeira Pinto, Private Participant

Programme structure and content

This course is held over 2 consecutive days.

During this course you will work with:

- 🕒 The well-functioning agile team
- 🕒 Intensive training in all events in Scrum: Planning, Daily Scrum, Review, and Retrospect
