PRINCE2® FOUNDATION

When participating in PRINCE2® Foundation, you will gain an insight into and work with the PRINCE2® method. With the PRINCE2® best practice method, you will increase the success rate of your projects because you will be applying a method that eliminates the risk of errors and failed projects.

PRINCE2® gives you the tools to achieve more effective project management where the aim is increased business benefits. Furthermore, you will gain productive project management collaboration, both internally and externally in your organisation.

You can also save money by purchasing [PRINCE2® Foundation and Project Management 1](#) in a combined course package.

Participant Profile

Project managers in private and public organisations. Some project experience is required as the course focuses on process-oriented project management according to the PRINCE2® method – not on specific tools for project management.

The course is for individuals wishing to gain an insight into the method. PRINCE2® is not a method that project managers can choose to use themselves. It is a general method, which the organisation can choose to follow in order to optimise project management.

Hence, you may be involved in projects that are being conducted according to the PRINCE2® method, or you may collaborate with clients or suppliers who use the method.

“The whole course was full of important content. Absolutely amazing facilitator. I felt that my time at the course was well spent.”

- Pihla Adalmiina Raevara, Talent Attraction Professional, Novo Nordisk A/S
